-	-The MAILING DATE of this communication appe	ars on the cover sheet with the o	correspondence address				
Therefore final rejection	LY FILED 28 October 2002 FAILS TO PLACE, further action by the applicant is required to a tion under 37 CFR 1.113 may only be either: (1 for allowance; (2) a timely filed Notice of Apperion (RCE) in compliance with 37 CFR 1.114.	void abandonment of this application to the same of th	cation. A proper reply to a ich places the application in				
	PERIOD FOR RE	EPLY [check either a) or b)]					
b) Technology Textension Textensi	a) The period for reply expires 3 months from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
	Notice of Appeal was filed on Appellant' CFR 1.192(a), or any extension thereof (37 CF

Response to Amendment

1. The amendment filed 10/28/2002 under 37 CFR 1.116 in reply to the final rejection has been considered but is not deemed to place the application in condition for allowance and will not be entered because the proposed amendment raises new issues that would require further consideration and/or search. The changes to page 11 line 6 and the changes to figure 6 raise new issues because it is not clear what kind of buffers make up the triple buffering of figure 6. Page 11 describes cycling through the triple buffers and does not tell what kind of buffers, zoom buffer, zoom front buffer, and zoom back buffer, are cycled through. Figure 5 is being used as a basis for creating figure 6 however, if page 11 is describing figure 6 then figure 6 provided by applicant does not show what is described by page 11.

Response to Arguments

2. Applicant's arguments filed 10/28/2002 have been fully considered but they are not persuasive.

The argument presented at page 9 lines 1-10 concerning claims 5 and 25 has been considered but they do not support the claim to "said portion is caused to be dragged or moved over said main surface of the frame buffer memory by movement of said cursor". The specification supports "The location of the selected zoom area once defined can be static in order to fix the zoom window on one region of the display or locked to the movement of any user input through an input device". The specification

Application/Control Number: 09/526,441 Page 3

Art Unit: 2672

did not describe dragging the zoom area over the main surface of the frame buffer memory.

The argument presented at page 9 lines 11-15 concerning Ranganathan have been considered but it is felt that changing an aspect ratio is clearly taught by Ranganathan. At column 8 lines 59-66 Ranganathan describes allowing the user to control the size of the movie window. At column 8 line 60 Ranganathan states the user may modify the movie window size. At column 8 lines 61 and 62 Ranganathan states that interpolation may be in the x or y directions. If the interpolation is in one of the x or y directions then the aspect ratio has clearly been adjusted. Thus, since the user may modify the movie window size, Ranganathan teaches adjusting the aspect ratio of the movie window.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffery A. Brier whose telephone number is (703) 305-4723. The examiner can normally be reached on M-F from 6:30 to 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Razavi, can be reached at (703) 305-4713).

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

Art Unit: 2672

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
